

# Cleaning up your Browser

*From "Cookies" and "Temporary internet files" in Internet Explorer !!*

## 1st Action

The simplest action in order to clean up your Browser from Cookies is just to Click on the Refresh button. Put your Mouse pointer on the Refresh icon and left click on your Mouse.

## 1st Action

The simplest action in order to clean up your Browser from Cookies is just to Click on the Refresh button. Put your Mouse pointer on the Refresh icon and left click on your Mouse.

## 2<sup>nd</sup> Action

Next level is to do the same as above but at the same time Press down and hold the Ctrl-

Button located in the left lower corner of your Keyboard. This action is doing the same as the first action but is making a deeper cleaning.

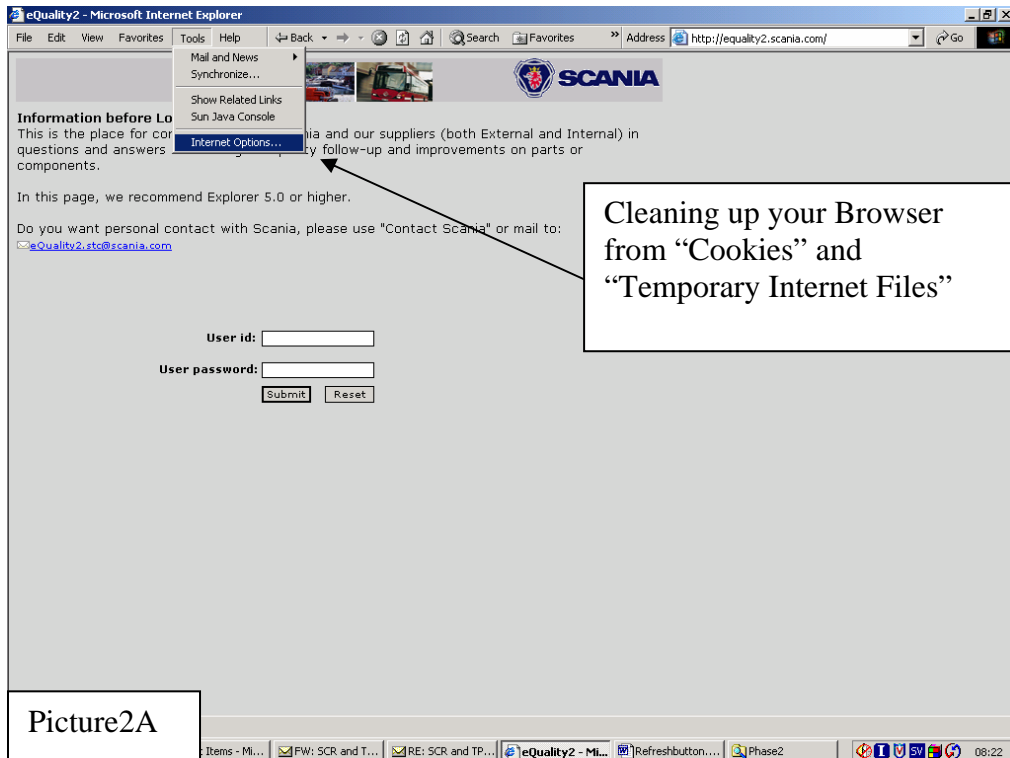

## 3<sup>rd</sup> Action

Third and most effective action is described in Picture 2 and 2A.

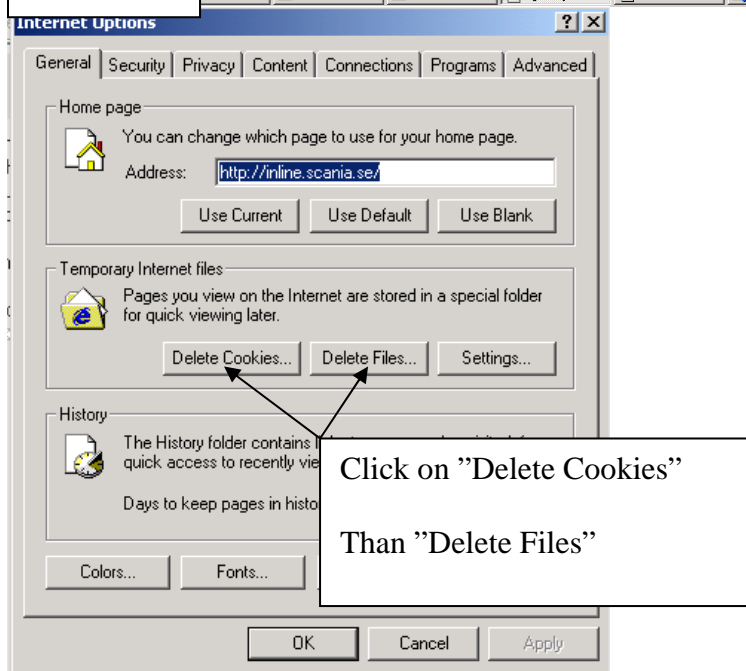

This action is in addition to Cookies cleaning up even cleaning up your Browser from so

Called "Temporary Internet Files".

Please OBSERVE that before you click on "Delete files" is it essential to check if you have any Internet links that you would like to save. Those can be saved as an Favourite below "Favorites" in your Browser.

**Regarding Action number 3 !!**

**If you would like to have an Browser that is always working in a proper way is it of great help for you to do this action at least once a week.**
